Education

CS-AIML

Lakshmi narain college of technology, Excellence • Bhopal (M.P.)

09/2027

Languages

Python, C++, Java script, CSS, HTML

Group work

As an active participant in my college's Google Developer Group, I have engaged in discussions and collaborative projects focused on emerging technologies. Recently, I successfully completed a Generative AI course, earning a certification that deepened my understanding of AI models, prompt engineering, and machine learning techniques. This experience has strengthened my technical foundation and fueled my passion for AI/ML, motivating me to further explore and apply these concepts in real-world projects.

About My Skills

I have a strong foundation in HTML, CSS, and JavaScript, eager to apply my skills in building responsive and user-friendly web interfaces. Passionate about creating visually appealing and functional websites, I have experience working on personal projects that demonstrate my ability to translate designs into interactive web pages. Continuously learning and staying updated with the latest web technologies, I am excited to contribute to a dynamic team and grow as a developer. And I intend to keep learning to achieve my goal in life that is to become an artificial intelligence and machine learning engineer to build interesting and useful AI models.
